

**POLI 395: Introduction to Statistics**  
**Spring 2017 (Syllabus Version: 2/10/2017)**  
**307 Sewall Hall, T R 10:50a-12:05p**

Justin Esarey  
Assistant Professor of Political Science  
E-mail: justin@justinesarey.com

108 Herzstein Hall  
Office Hours: T F 2:00 – 3:00 PM  
Phone: 404-323-2617

**COURSE OBJECTIVES AND LEARNING OUTCOMES**

This course introduces students to basic ideas in scientific epistemology, social science research design, statistical analysis, and the application of all these ideas to substantive questions in political science.

Students will be able to:

1. understand basic approaches to the scientific study of the social world to substantive topics in political science;
2. execute and interpret statistical analysis of quantitative political data to answer about substantive questions in political science; and
3. recognize and understand threats to inference based on empirical data in political science, including the weaknesses of research designs and statistical analyses.

**GRADING POLICIES AND ASSIGNMENT DETAILS**

**Grade Components:**

- Homework: 25%
- Exam 1: 25%
- Exam 2: 25%
- Final Exam: 25%

**Grading Scale:**

100%-97%: A+	76.9%-73%: C
96.9%-93%: A	72.9%-70%: C-
92.9%-90%: A-	69.9%-67%: D+
89.9%-87%: B+	66.9%-63%: D
86.9%-83%: B	62.9%-60%: D-
82.9%-80%: B-	>59.5%: F
79.9%-77%: C+	

**Exams:** There will be three exams in this class, two midterms and a final. All exams are cumulative, but will focus on material learned since the last exam. Exams will be take home, you will have 90 minutes in which to take the exam and you will be bound

by the honor code when taking the exam. No materials, references, or other students may be consulted during an exam.

**Homework:** Homework problem sets will be distributed on Canvas. I encourage collaborative work on problem sets: the goal of a homework problem set is to help you learn the material and enable you to perform well on the (non-collaborative!) exams. With that said, simply copying another student's homework answers is not permitted and will be treated as academic dishonesty.

**Attendance:** Regular attendance is typically a prerequisite for success in the class, although no points are deducted on the basis of an absence alone. Anything taught in class is testable material, and not everything I teach in class will be in the course reading material.

## **COURSE POLICIES**

**T/A Office Hours:** The teaching assistant for this class is Santiago Sosa, a PhD student in the political science department. Santiago will hold office hours for four hours per week, assisted by two undergraduate T/As (Avesh Krishna and Erika Schumacher). These sessions will be held from 5:15-7:15 PM on Monday in Keith-Wiess 130 and from 6:00-8:00 PM on Thursday in Sewall Hall 101.

**Late Work:** Assignments are due at the date and time I specify for the assignment. Late homeworks will be marked off at 5 percentage points for the first 24 hours late, and an additional 10 percentage points for every subsequent 24 hours late.

Important note: Students are responsible for submitting working, uncorrupted files for all assignments. If a file is corrupted and needs to be re-sent, and re-sending happens after the assignment deadline, a late penalty will be assessed.

Exams may not be taken late. Failing to take the exam at the scheduled time will result in no credit for the exam.

Penalties for late homeworks or missed exams may be waived under the following three circumstances:

- (1) a death in the immediate family (parent, spouse, sibling, or child) within two weeks before the assignment due date;
- (2) in the event of an unforeseeable medical emergency affecting you, your spouse, or your child; or
- (3) participation in a Rice-sponsored academic or sporting event.

In the event of (1) or (3), you must give me **at least 24 hours advance notice and preferably more** (via e-mail or a phone call) that you will miss the exam/homework, or it may not be made up. I may require supporting documentation. All penalty

waivers are at the discretion of the instructor. Under these circumstances, I will extend your homework due date or schedule you a make-up exam time. **Important note: conflicts with a work schedule, non-academic trip, or vacation are not a valid reason to miss an exam or any other assignment** and cannot be the basis for a penalty waiver.

**Honor Code/Academic Misconduct:** All forms of academic misconduct will be handled according to the Rice University Honor Code. Details on the Honor Code are available at <http://honor.rice.edu/honor-system-handbook/>.

If you ever have any questions about what you should do to stay within the honor code on a particular assignment, **contact me with your question and I can assist you**. I cannot guarantee a timely response unless you contact me at least 24 hours in advance of the time the assignment is due.

**Students with Disabilities:** If you have a disability and require accommodation in this class, please contact me as soon as possible (within the first two weeks of class) to discuss these accommodations. You will also need to contact the Disability Support Services Office (telephone extension: 5841) in the Allen Center.

**Syllabus Change Policy:** All policies of this syllabus may be changed by Prof. Wilson with advance notice.

## **COURSE MATERIALS**

### **Required Texts:**

- Kellstedt and Whitten. 2013. *The Fundamentals of Political Science Research, Second Edition*. Cambridge University Press.
- James E. Monogan III. 2015. *Political Analysis Using R*. Springer.

### **Optional Texts:**

- Maindonald and Braun. 2013. *Data Analysis and Graphics using R: An Example Based Approach, Third Edition*. Cambridge University Press. (Expensive, but comprehensive. Buy it if you think you'll be pursuing statistics in the future.)
- Veneables, Smith and the R Core Team. 2015. An Introduction to R. Version 3.2.3. <https://cran.r-project.org/doc/manuals/R-intro.pdf> (This is free and is a nice overview of R.)

Other readings are available on the Canvas website.

**Software:** This course will teach material primarily through R. We will be using a server that is specially configured for R. Basically you will need your computer (or a tablet) and a browser.

In order to use R you will go to: <https://rstudio.justinesarey.com/> In order to use this protected server you will need a user name and password (which will be supplied).

In addition R is free and available for Windows and Macintosh from <http://cran.r-project.org/>. RStudio is also free and available for Windows and Macintosh at <http://www.rstudio.com>.

All students must have a valid Rice e-mail address and login (and access to the Canvas website) to participate in this course.

### **COURSE OUTLINE AND ASSIGNED READINGS**

<b>Date</b>	<b>Topic</b>	<b>Readings</b>
Jan 12	<b>Introduction</b> <b>A bit of R</b>	<ul style="list-style-type: none"> <li>• Monogan, Ch. 1</li> </ul>
